About

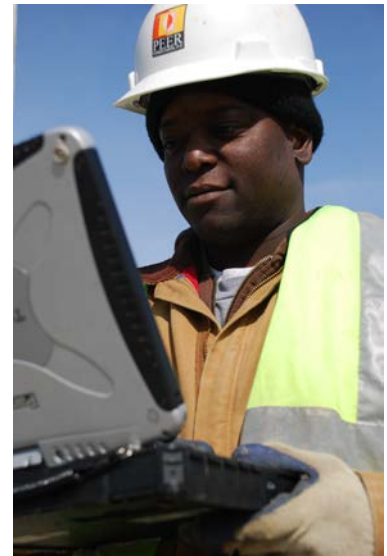

Over the past several years, PEER has been expanding its Field Services discipline, which provides support by: performing mechanical and visual inspection of sanitary sewer and storm sewers; conducting pipeline cleaning and inspection services; executing closed circuit television (CCTV) inspections of mainlines, service connections, and underground structures, such as manholes; locating and inspecting utility structures in roadways and easements; evaluating assets for structural, functional, and constructability conditions; and managing traffic control activities.

The Field Services discipline is located out of our Laurel, MD office and is managed by a team of senior-level professionals who have combined experience in trenchless technologies, specializing in sewer cleaning and CCTV inspections. Their strengths lie in the areas of pipe cleaning, PACP sewer mainline CCTV inspections, LACP house connection inspections, and MACP manhole inspections. They are also skilled in manhole rehabilitation, sewer bypasses, trenchless repair, and flow monitoring among other aspects of sewer rehabilitation.

Field Services has inspected more than 7 million linear ft. of sanitary sewers...

Services

- Lateral Inspections with a “pan& tilt” camera
- Closed Circuit Television (CCTV) Inspections & Pipe Cleaning
- Manhole Inspections & Locations
- Sewer System Evaluation Studies (SSES)
- Infiltration & Inflow (I&I) Studies
- Smoke Testing
- Dyed-Water Testing
- Flow Monitoring, Isolation, & Measurement
- Hydrant & Valve Testing & Maintenance
- Water Main Inspection
- Traffic Control

Our Field Services staff is NASSCO-certified PACP, MACP, and LACP, and has conducted over 20,000 manhole inspections.

Equipment

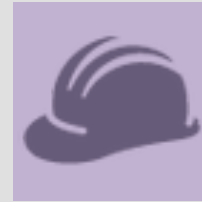

- 🛡️ 7 state-of-the-art CCTV trucks
- 🛡️ 2 Manhole Inspection units
- 🛡️ 2 Lateral cleanout inspection van
- 🛡️ 1 - 80 GPM straight jet truck
- 🛡️ 3 - 80 combination jet/vac trucks
- 🛡️ 3 High output smoke blowers
- 🛡️ Cameras equipped with Sonde locating system
- 🛡️ Utilize Flexidata software package from Pipelogix
- 🛡️ Able to clean and inspect pipelines from 3 to 100+” in diameter

Personnel

- 🛡️ NASSCO-certified PACP, MACP, LACP
- 🛡️ Maryland Certified Temporary Traffic Control managers
- 🛡️ Experienced senior-level management team of engineers, field services professionals and trained technicians
- 🛡️ Inspected > 7 million linear ft. of sanitary sewers, sanitary sewer laterals, and storm sewers
- 🛡️ Conducted > 20,000 manhole inspections
- 🛡️ 7 CCTV crews available
- 🛡️ Field staff members and journeymen / experienced operators on team

**We're ready to serve your Field Services needs —
Please contact us at 301.604.1596 or 202.478.2060 today!**

Since 1978, we've focused on:

Delivering transformative, sustainable, and appropriate solutions to today's challenging environmental problems — using a personalized approach each and every time.

Every day we are realizing our vision as a prosperous and productive environmental company that exceeds the expectations of our clients and employees, while delivering high-quality services that enhance the natural and built environments.

Our office is located at:

7806 Braygreen Road, Suite 107
Laurel, MD 20707
